Chill Chat Tip

Air Conditioning Efficiency Can Be Obtained By Keeping the Outdoor Unit Clear Of Debris, Leaves And Shrubbery--your air conditioner may look neat on the inside, but that does not mean that it can do away without inspection or cleaning. Remember, not everything is installed inside. A part of it is left outside the house, which means that you need to check once in a while whether the outdoor unit, too, is accumulating unwanted dirt. One important thing to note are the trees that sit beside it. Fallen leaves may hinder the efficiency of the air conditioning unit so make it a habit to clear your air conditioning units with fallen shrubs. Back to Top
